STATE	WAR	NAVY	JUSTICE						

1. All the installations of the masag works (Hugo Schneider A.G.) at Taunsdorf (L21) and Tauche (L31) near Leipzig have been dismantled and removed. Only the foundations of the workshops remain, although a few administrative and auxiliary buildings are still standing.

2. It is rumored, nevertheless, in Leipzig that production of "Panzerfaust" anti-tank weapons is to be resumed. This could take place, however, only on a small scale in the few buildings left intact and would presumably only have the object of perfecting construction of a few models with a view to production elsewhere later and of attracting expert technical labor.
